

Correct Toes Product Description

Editorial

Designed by sports podiatrist, Dr. Ray McClanahan, DPM, Correct Toes help the foot rehabilitate from the negative effects from conventionally shaped footwear. Made from soft, flexible silicone, Correct Toes encourage toes back into their natural alignment. With progressive and cumulative use while active and weight bearing, toes align and feet strengthen, restoring the foot's original position and function.

E-commerce

Original:

The only silicone toe spacer designed by a sports podiatrist to be used while being active. Reverse the damaging effects of footwear by using Correct Toes barefoot or in naturally shaped shoes.

Splash Collection:

Color each step with Correct Toes Splash Collection. Now available in Plum and Aqua. Designed by Dr. Ray McClanahan, DPM, Correct Toes are made from soft, flexible silicone and encourage toes back into their natural alignment. With progressive and cumulative use while active and weight bearing, toes align and feet strengthen, restoring the foot's original position and function.
